INTRODUCTION

Replacement parts can sometimes be hard to find. The case on the m105 can be easily removed, and a replacement shell casing can be used to replace your damaged one. Check out this site [here](#) for a replacment.

TOOLS:

- [T5 Torx Screwdriver](#) (1)
-

Step 1 — Case Shell

- Remove the protective flip lid of the device. Open lid and pull. There is two clips the will pop out.

Step 2

- Next remove the face plate. There is a tab at the top of the device that un clips allow you to remove the face plate

Step 3

- Remove the batteries by opening the battery compartment on the back of the device. Remove one battery at a time

Step 4

- Using a T-5 Torx screwdriver, remove all four screws on backside of device by turning counterclockwise. [Screwdriver located here.](#)

Step 5

- Once the four screws are removed, you are able to remove the back and front cover from the interior parts of the device.

Step 6

- This is what the case of the device should look like when completed.
- You can purchase a new shell here: [Replacement Shell Palm m105](#)

To reassemble your device, follow these instructions in reverse order.
